»MEDITATION PLACE

"Meditation place / T Meditation Place is oval form half sphere coming from the ground, like big giant fruit half of it forming the palace , and the visitors can walking inside and sitting in the throne in the middle of the space and feel the symbiosis with nature / 6m x 6m x 3m  
After the first experiences with the corona situation I decided to design a place in the park where people can be isolated in Temple. Located in the center of the temple is huge throne intended only for one person. Through meditation you will always feel nature closer and it becomes part of your identity. Through the open parts of the Meditation Place connect you more strongly with the environment. Relax and meditate you that are the concept for using the temple, which was created from natural materials / drift wood, or wood for the throne and branches for the Temple.
