

# REVERIE GARDEN

In 2024, we stand at a crossroads in a world where technology and nature often seem at odds. The “Reverie Garden” emerges as a symbol of our enduring connection to the natural world, calling for a reflection on ecological consciousness and sustainable living.

Reflecting on past garden installations like the “Living Room” in 2000, we remember the paradoxical relationship between humans and nature. The “Reverie Garden” breaks away from this paradox, drawing inspiration from Emanuele Coccia’s philosophy, which envisions nature as a shared dream. This vision promotes harmonious coexistence, challenging the idea of a conflicting relationship with nature.

In the “Reverie Garden,” humans step into nature’s dream, where boundaries blur by using the white curtains. Explore the garden, find new outdoor living room and contemplate about our mysterious bond with nature, our possibility of shared ecology.

The “Reverie Garden” embodies our reverence for nature and commitment to sustainable living, offering a vision of harmonious coexistence between humanity and the environment in our collective dream of a more ecologically aware future.
