

MOBILE GARDENS

Mobile Garden
Gather Point

The Mobile Garden will be a group of repurposed bicycles transformed into roving gardens, transporting visitors through the festival grounds in a unique and interactive way. Using recycled materials, the bikes will be adorned with a variety of plants, including vertical vines, cascading foliage, and colorful blooms. The Mobile Garden will provide an immersive experience, offering a new perspective on the traditional garden, while also promoting sustainability and creativity. As mobility agents, the bikes will serve as both transport and entertainment, fostering an interactive and engaging atmosphere for festival-goers. The Mobile Garden will create a one-of-a-kind experience that celebrates the beauty of nature and the ingenuity of upcycling. The vehicles can be used in the city later.

Proposed Plants

Hanging plants, like ferns or ivy, that could spill over the sides of the unit and create a cascading effect
Maidenhair Fern (*Adiantum pedatum*)
Major Wheeler Coral Honeysuckle (*Lonicera sempervirens* 'Major Wheeler')

Plants that produce colorful flowers, like petunias, to add a pop of color to the mobile garden
Wild Petunia (*Ruellia humilis*)
Narrow-leaf coneflower (*Echinacea angustifolia*)

Drought-tolerant plants, like sedum or sempervivum, that require minimal watering and can thrive in a mobile environment
Broadleaf stonecrop (*Sedum spathulifolium*)
Goldmoss stonecrop (*Sedum acre*)
