

# SCAPE SHIFT

The stage is set for people to be part of a shifting landscape, where the earth provides rhythm to our thoughts, emotions and movement, we begin to restore our inherent relationship with nature. Scape Shift stems from the notion of capturing moments where the landscape is actively responding to environmental uncertainty by taking a stroll through a sculptural rain garden that demonstrates its ability to change in shape and form over time. The garden is situated in a rectangular shaped depression, engulfed by a series of free-standing structures, basalt stepping stones, and layered planting. The path follows a meandering route, in which people navigate through different conditions to experience beauty, decay and growth within this sunken rain garden. The design relies on a mixture of soft and hard mediums, exposing their physical and ephemeral qualities to create a space that encourages people to interact with the materiality, our environment, and each other.

## CHANGE OVER TIME

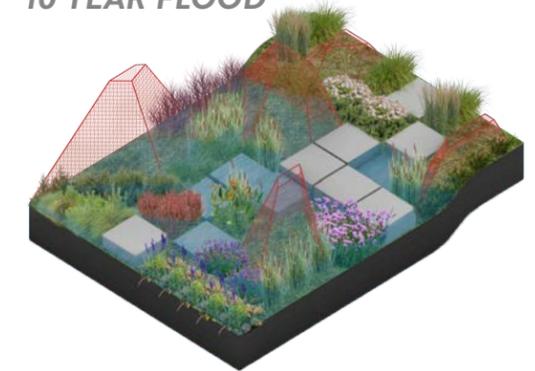

YEAR 0

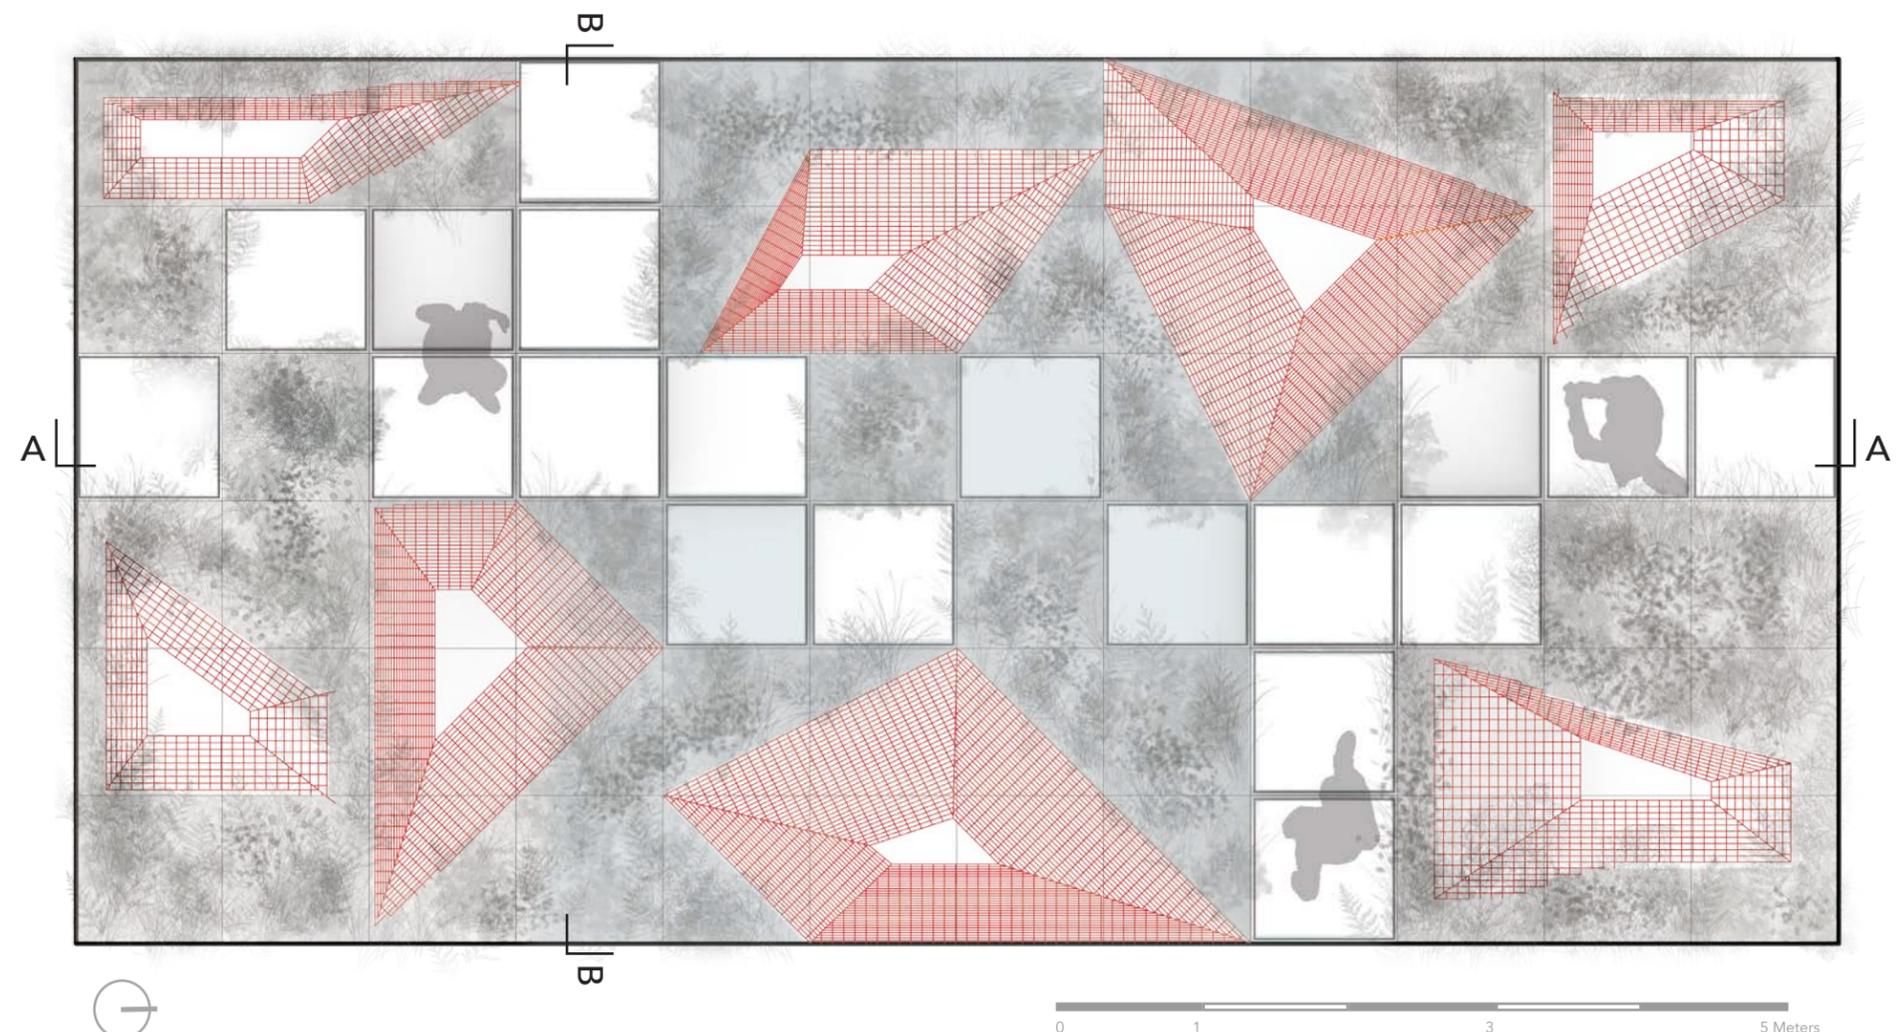

5 YEAR FLOOD

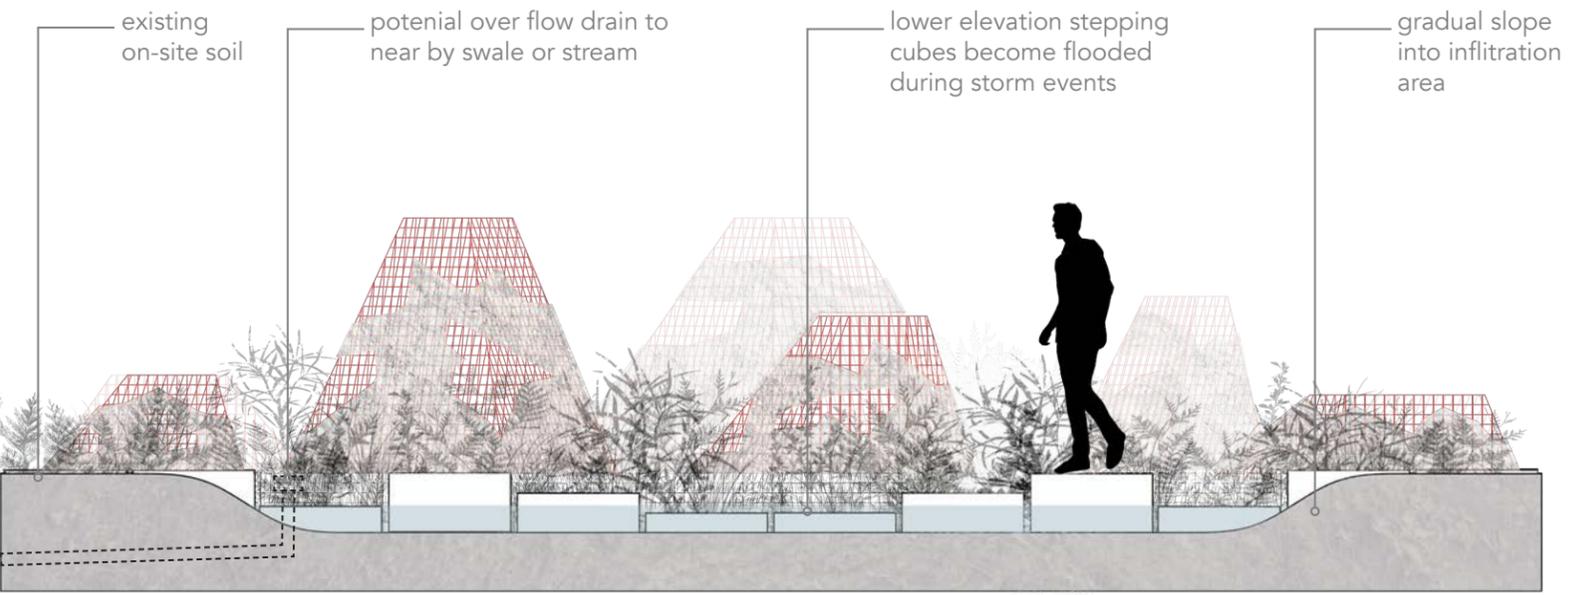

10 YEAR FLOOD

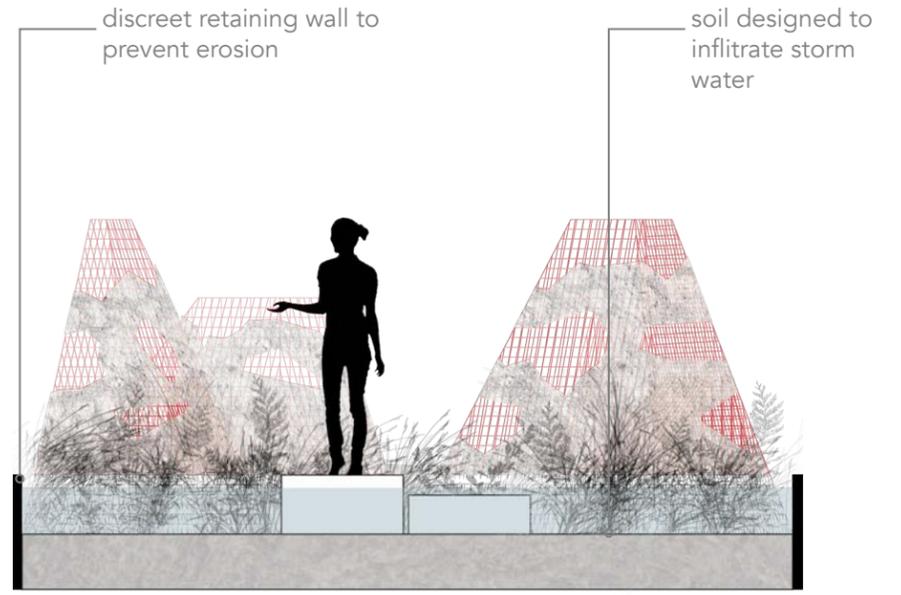

PLANT LIST: 'Blauhugel' Sage (*Salvia x sylvestris* 'Blue Hill') | Blue Vervain (*Verbena hastata*) | Common Sneezeweed (*Helenium autumnale*) | Corkscrew Rush (*Juncus effusus* 'Spiralis') | Eagle Fern (*Pteridium aquilinum*) | Kelsey Dwarf Dogwood (*Cornus sericea* 'Kelseyi') | Mountain Mint (*Pycnanthemum virginianum*) | Northern blue flag iris (*Iris versicolor*) | Northern bush honeysuckle (*Diervilla lonicera*) | Sweetgrass (*Hierochloa odorata*) | Twinflower (*Linnaea borealis*)
