

CONCEPT:

Rooted in the recognition of relational dynamics and humanity's interconnected understanding of the natural universe, the envisioned garden, "Play the Ground," encapsulates a transformative journey. This multi-sensory oasis transcends conventional garden norms, fostering unity in the face of climate change. Reframing gardens as socially responsible realms, the design addresses the contemporary call to collectively safeguard biodiversity. Unfolding as a dynamic playground, it symbolizes a 25-year evolution and environmental consciousness.

Comprising distinct zones for seeding, urban gardening, and communal interaction, the garden emerges as a dynamic platform for learning, experimentation, and ecological awareness. Through interactive engagement, it evolves into a living exhibition, dynamically shaped by visitors actively participating in its botanical and horticultural dimensions. The central space encourages social interaction, reflection, and contemplation. "Play (the) Ground" transforms the garden into a lively, interactive space—a dance that enriches, develops, and nurtures a harmonious coexistence between people and nature.

LEGEND:

- 1. Seeding zone Visitors can freely pot a plant in the dedicated places or take care of already planted plants.
- 2.Urban gardening Visitors can make experience with growing edible species in the fully equipped area.
- 3. Central garden for admiration, contemplation and communal interraction.

* All elements are planned to be in flexible wooden structure designed to be easily inserted in any urban or rural context.

LIST OF SUGGESTED PLANTS:

Trees(in the central garden):
American Beech, Balsam Fir, Juniper

Plants and flowers (focused on edible plants):
Dogrose, Lavender, Cranesbill
Dandelion, Ginseng, Mayapple, Chicory,
Greenbrier, Mustard, Common plantain;
White Clover, Daylily, Woodlily Coneflower
Violet, Musk Mallow, Wild mint, Pepper mint.
